

Brass Wrap™ Sousaphone™

Proudly made in

Montana, USA

Neotech's **Brass Wrap™-Sousaphone** is the ideal accessory for the instrument's valves to protect the finish from moisture and oils from the hand. It has the added benefit of keeping the valves warm for better responsiveness while marching in colder temperatures.

The soft durable neoprene construction fits snugly on the instrument for a firm and comfortable grip, making it ideal for rehearsals or long gigs.

The **Brass Wraps™** line of products offer protection for Trumpets, French Horns, Baritones/Euphoniums, and now Sousaphones as well.
